DROs: IP67-rated for your toughest applications.

Mitutoyo AT715 Linear Magnetic Encoders & DRO Systems

Talk about tough: IP67-rated Mitutoyo AT715 linear encoders with electromagnetic induction scales are coolant submersible. And their patented Mitutoyo ABSOLUTE® technology means the datum origin point is never lost—even with power interruption.

Matter of fact, the AT715 is so robust it carries a 5-year warranty against manufacturing defects. And the wide range of Mitutoyo KA Counter Kits & Accessories make it easy and cost-effective to install or retrofit AT715 scales on mills, lathes—any machine tool.

For extreme-reliability DROs, count on Mitutoyo—the world leader in metrology. With world-class products, services and innovative support backed by global process expertise, our solutions are tough to beat.

Visit www.mitutoyo.com for more information.

IP67 – Rating signifies an enclosure that is sealed completely dust-tight and able to withstand temporary immersion in a tank from 15cm to 1m with no ill effects.
