

IP66-rated form, fit, and function

Mitutoyo ID-N/ID-B Coolant Proof Digimatic Indicators

IP66-rated Mitutoyo ID-N Slim Type and ID-B Back Plunger digimatic indicators are virtually immune to dust, chips and coolant. Good thing too, because with compact, flat-sided housings only 1.38" (35mm) wide, they'll fit almost anywhere—including fixtured multiply, side-by-side—in even the most abusive applications.

With the industry's highest accuracy and Mitutoyo's Absolute® sensor which eliminates "origin-set" during multipoint measurements, with reversible displays for flexible orientation (ID-B indicator displays face upward, an industry first) plus the ability to link to MeasurLink®, Mitutoyo's enterprise-wide data management software, these are the industry's most advanced indicators. And just what you'd expect from Mitutoyo—with world-class applications expertise, engineering services and global best practice—the world leader in metrology instruments.
