### New Mitutoyo ID-C Digimatic® indicators

(Aurora, IL) Mitutoyo's newly redesigned ID-C Digimatic® indicator combines numerous advances to create the category's most user-friendly digital indicator.

The new ID-C indicator starts with the foundation of Mitutoyo's Absolute® measuring system eliminating the need for re-setting the origin at power-on, improving efficiency and repeatability. Key improvements include: Variable resolution settings, and a calculator function - all functions now accessed via three, large color-coded buttons. To improve readability and usability, the display area has been enlarged by 50%; the plunger release stroke has been extended; and the lifting function expanded. Data-hold and data-output functions have also been added to the new ID-C indicators enhancing the operator's ability to manage measurement results. These data functions include a lock feature to prevent mis-operation.
