

## NEW PRODUCT ANNOUNCEMENT

Dear Mitutoyo Distributor,

We are pleased to announce the release of the new **QIPak V 5.0**, vision inspection system software for use with our new line of Quick Image Generation C, as well as Generation B, measuring systems. This version incorporates numerous innovative new measurement features and a measurement guide for beginners to immediately start using the system without opening a manual. This Quick Image software provides a solution with measurement efficiency in mind. This exciting new version further establishes Mitutoyo as an industry leader in Vision measurement and inspection.

Key features added to QIPak 5.0 measurement software:

- One-click measurement function
- Measure multiple parts simultaneously
- Automatic part alignment recognition
- User defined overlay templates for judgment
- Easy mode for operation by entry level user
- On-image results display with color tolerance
