

NEW PRODUCT ANNOUNCEMENT

Dear Mitutoyo Distributor,

We are pleased to announce the release of the new **Wide Field of View Video Microscope Unit (Wide-FOV VMU)**. The Wide-FOV VMU can be integrated into custom equipment easily, while supporting Mitutoyo's Finescope Objectives. Horizontal and vertical models help avoid wide-FOV camera interference, when combining two or VMUs (See Fig. 1). This exciting new optical unit further establishes Mitutoyo as an industry leader in the Microscopy field.

Key features of Wide-FOV VMU

- Higher throughput - Approximately seven times larger FOV than standard VMU units
- A wider area can be inspected by combining multiple VMU units
- Rigid Design allows for High Speed Movement of Inspection Equipment
- Support Various Observation Methods
 - Bright-field Observation (All models)
 - Dark-field Observation (BD models)
 - Polarization Observation (All Models)
- Various Accessories to meet a wide array of requirements
- C mount adapter comes as standard
