Analysis Software

FORMTRACEPAK

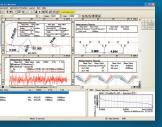

FORMTRACEPAK functions offer total support for measurement system control, surface roughness analysis, contour analysis, contour tolerancing, and inspection report creation.

Surface roughness analysis

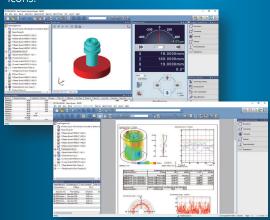

Contour analysis

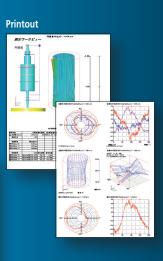

ROUNDPAK

A wide variety of parameters including those for roundness/cylindricity, as well as flatness and parallelism, are provided as standard features. You can visually select these parameters using icons.

Note: All information regarding our products, and in particular the illustrations, drawings, dimensional and performance data contained in this printed matter as well as other technical data are to be regarded as approximate average values. We therefore reserve the right to make changes to the corresponding designs. The stated standards, similar technical regulations, descriptions and illustrations of the products were valid at the time of printing. In addition, the latest applicable version of our General Trading Conditions will apply. Only quotations submitted by ourselves may be regarded as definitive. Specifications are subject to become without orders.

Mitutoyo products are subject to US Export Administration Regulations (EAR). Re-export or relocation of our products may require prior approval by an appropriate governing authority.

Trademarks and Registration

Designations used by companies to distinguish their products are often claimed as trademarks. In all instances where Mitutoyo America Corporation is aware of a claim, the product names appear in initial capital or all capital letters. The appropriate companies should be contacted for more complete trademark and renistration information.

Introducing Mitutoyo's Full Line of Form Measuring Equipment

1-888-mitutoyo | www.mitutoyo.com

Dramatically increased drive speed (X axis: 80 mm/s, Z2 axis: 30 mm/s) further reduces total measurement cycle time.

FTA-C3200

that is easy to navigate.

Both skidded and skidless measurement are possible with this series. Equipped with 46 roughness parameters that conform to the latest ISO. DIN. ANSI. and JIS standards.

The 2.4-inch color graphic LCD provides excellent readability and an intuitive display

Surface Roughness Measuring Systems

SJ-210

Data processing unit includes a 5.7-inch

high-speed thermal printer.

color graphic LCD touch-panel and a built-in

SJ-310

Semi-portable type that is PC based, capable of measuring in axial direction for parts such as crankshafts by simply swiveling the detector through 90 degrees.

Roundness Measuring Systems

Best-in-class rotational accuracy in compact type roundness measuring instruments. Fine adjustment on both X- and Z-axes

RA-120P

A new PC-compliant roundness and cylindricalform measuring instrument with extensive analysis features to enable measurement of a wide variety of workpieces.

RA-1600 / RA-1600M

When combined with the double cone-end stylus (a new product with diametrically opposed contact points), the instrument can continuously measure in the upward and downward directions without the need to change the arm orientation or reset the workpiece fixturing.

FTA-C4000

Optional detector holders such as Crank Rotary type and Manual Rotary type make this versatile for many different applications.

All models are equipped with a highly accurate turntable that enables simple and accurate centering and leveling of the workpiece, which account for the majority of the essential setup work for measuring roundness/cylindricity.

RA-2200 / RA-2200 PLUS

This model introduces the dual-sided stylus design into the CNC model for the first time. The SV-C 4500CNC is a high accuracy contact type contour and surface roughness measuring system.

SV-C4500 CNC

CNC Surface Roughness Tester incorporating a column-moving type configuration that is ideal for measuring large/heavy workpiece such as engine blocks and crankshafts.

SV-M3000 CNC

These models offer high measuring accuracy and reliability using automated measurement with independent/simultaneous multi-axis CNC control. A high-end machine that integrates roughness, contour and surface roughness measuring all-in-one.

Roundtracer Extreme
