Portable Surface Roughness Tester  
Surftest SJ-210/310 Series
Portable Surface Roughness Tester

**Surftest SJ-210/310 Series**

**Surftest SJ-210 Series**
The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

Refer to page 4 to 7 for details.

**Surftest SJ-310 Series**
The Surftest SJ-310 is a compact, portable, easy-to-use surface roughness measurement instrument equipped with extensive measurement and analysis features.

Refer to page 8 to 11 for details.
**Enhanced power for making measurements on site**

Charging is reduced approximately one quarter of the time compared with conventional models. The detector supports a variety of measurement orientations and can perform measurements up against a wall surface or while facing upward. When combined with optional accessories such as a height gage adapter, the detector can perform measurements in various orientations and settings.
**Surftest SJ-210 Series**

**High-speed USB communication**
Data can be transferred to and from a computer via the high-speed USB interface.

**Memory card support**
The memory card slot lets you store large amounts of data onto a memory card.

**Applicable standards**
In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

**Multilingual support**
The display interface supports 16 languages.

**Battery**
The battery charges in one quarter of the time of previous Mitutoyo products.

**Color graphic LCD**
Intuitive display that's clear, sharp, and legible.

**Large, 2.4-inch LCD**
The large LCD provides excellent readability.

**Backlight**
The backlight improves visibility in dark environments.

**Operation keys**
- The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.
- The user-friendly screen layout and arrow keys provide intuitive operability.
- Displayed settings can be changed easily by using the left and right arrow keys.
- Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

**Drive unit**
The drive unit can be separated from the display unit by using a cable, allowing more flexible measurement. The driver can be separated and reattached in one simple step.

There are many different kinds of drivers and detectors available.
(Refer to page 6, 13, 14 for details.)
**Extensive display features that assist measurement**

- The highly visible 2.4-inch color graphic LCD with backlight lets you view the screen easily even in dark environments.

- Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.

- The display mode can be easily switched between portrait and landscape.

- Calculation results are displayed in large characters.

- Pass/fail results are displayed in color.

**Advanced data storage capabilities**

- Up to 10 measurement conditions can be stored in the internal memory. Conditions can be quickly read according to the workpiece.

- An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.

**Storage capacity of memory card (optional)**

<table>

<td>500</td>
</tr>
</tbody>
</table>

- Many interface options:
  - A USB interface is equipped as standard.
  - The Surftest SJ-210 also provides an RS-232C output, Digimatic output, printer output, and foot switch input.

- Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.

**Stylus alarm function**

- An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit.

**Easy setting**

- Displayed settings can be easily changed by pressing the left and right arrow keys under the sliding cover. For example, these keys can be used to switch the cut-off value (\(\epsilon_c\)) and the number of sampling lengths (\(N\)) on the measurement screen.

**Setting parameters and recalculating results**

- The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.

* May not be possible, depending on the measurement conditions.
SJ-210 Series
A wide variation in system setup is possible with the detector + drive unit + display unit combination

Highly functional detectors and drive units

The driver can be separated from the display unit and reattached in one easy step.

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

Refer to page 14 for details of detector.

Detector supplied as standard

Selectable from the following two items.

- Measuring force: 0.75 mN
  Stylus tip: Tip radius 2 µm
  Tip angle 60°
- Measuring force: 4 mN
  Stylus tip: Tip radius 5 µm
  Tip angle 90°

Positive stylus contact indication

Stylus contact with the workpiece is indicated by color coding in the display. This is helpful when visibility of the surface to be measured is restricted (e.g. when measuring within a shrouded feature or groove).

Drive units (selectable)

- Standard drive unit
  • Popular standard drive unit
- Transverse tracing drive unit
  • Best suited for measurement of narrow, shrouded workpiece features such as crankshaft, EDM parts, etc. (Patent Registered in Japan)
- Retractable drive unit
  • The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose profile cannot be easily seen, such as a blind hole, etc.

Carrying case

A convenient carrying case is supplied as standard for protecting the instrument in the field.

- **Cut off length:** 0.003, 0.01, 0.03, 0.1", 0.25", 0.5", 0.8", 2.5mm
- **Sampling length:** 0.003, 0.01, 0.03", 0.1", 0.25", 0.5", 0.8", 2.5mm
- **Number of sampling lengths (xN):** x1, x2, x3, x4, x5, x6, x7, x8, x9, x10
- **Arbitrary:** 0.01 ~ 63" (0.001" interval) [0.3 ~ 16.0 mm: 0.01 mm interval]

| LCD dimensions | 1.45 x 1.93" (36.7 x 48.9 mm) |
| Display languages | Japanese, English, German, French, Italian, Spanish, Portuguese, Korean, Traditional Chinese, Simplified Chinese, Czech, Polish, Hungarian, Turkish, Swedish, Dutch |
| Measurement result display | Vertical display: 1-parameter display/3-parameter display/Trace display |
| Horizontal display: 1-parameter display/4-parameter display/Trace display (horizontal display is invertable) |

| Printing function | Measurement conditions/Calculation results/GO/NG judgement result/Calculation results for each sampling length/Assessed profile/Bearing area curve/Amplitude distribution curve/Environment setting information |

| External I/O | USB I/F, Digitmatic Output, Printer Output, RS-232C I/F, Foot SW I/F |
| Customization | Desired parameters can be selected for calculation and display |
| GD/NG judgment | Be max value/16% Standard deviation |
| Storage of measurement condition | Save the conditions at power OFF |

| Functions | Internal memory: Measurement condition (10 sets) |
| Storage | Memory card (Option): 500 measurement conditions, 10000 measured profiles, 500 display images |
| Calibration | Text file (Measurement conditions/Measured profile/Assessed profile/Bearing area curve/Amplitude distribution curve) |
| Auto-calibration with the entry of numerical data? | Auto-calibration with the entry of multiple measurements (Max 5 times) is available |

| Power-saving function | Auto-steep off function (10-600 sec) |
| Power supply | Two-way power supply: battery (rechargeable Ni-MH battery) and AC adapter |

- **Note 1:** Charging time: about 4 hours (may vary due to ambient temperature) |
- **Note 2:** Endurance: about 1000 measurements (differs slightly due to use conditions/environment) |

| Size (WxDxH) | Display unit: 2.05 x 2.6" x 6.3" (52 x 65 x 160 mm) (sliding cover closed, detector not mounted) |
| Drive unit: 4.5 x 9 x 1.02" (115 x 23 x 26 mm) (detector not mounted) |

| Mass | About 1.1 lbs (500g) (Display unit + Drive unit + Standard detector) |

- **Standard accessories:**
  - 128AA303 Connecting cable
  - 178-601 Roughness specimen Ra (3 µm)
  - 125BAR344 Carrying case
  - 128AK700 Calibration stage
  - Protective sheets for display, AC Adapter, Operation manual, Quick reference manual, Warranty

- **12BAA303 Connecting cable**
- **178-605 Roughness specimen Ra (1 µm)**
- **12AAE643 Point-contact adapter**
- **12AAE644 V-type adapter**
- **128BAR344 Carrying case**
- **128AK700 Calibration stage**
- **Protective sheets for display, AC Adapter, Operation manual, Quick reference manual, Warranty**

---

1. Calculation is available only when selecting the VDA, ANSI, or JIS '82 standard.
2. Calculation is available only when selecting the ISO '97 standard.
3. Calculation is available only when selecting the JIS '01 standard.
4. Calculation is available only when selecting the ANSI standard.
5. Not available when selecting the JIS '82 standard.
6. Order the SJ-210 printer (178-421) for Japan and (178-422) for all other countries.
7. Standard deviation only can be selected in ANSI. 1% rule cannot be selected in VDA.
8. Auto-steep off is invalid when AC adapter is used.
9. For connecting the calculation display unit and drive unit.

Note: To denote your AC line voltage add the following suffixes (e.g. **178-560-11A**):
- A for 120 V, C for 100 V, D for 230 V, E for 230 V (for UK), DC for 220 V (for China), K for 220 V (for Korea).
**Surftest SJ-310 Series**

**User friendly, high-functionality display unit with integrated high-speed printer**

The large 5.7-inch color graphic touch-screen LCD provides excellent readability. Furthermore, selecting icons from the touch panel display provides intuitive and easy operation. The integrated high-speed printer offers the user the ability to perform the entire measuring and printing process with the push of a single button (START button). * Text display can also be selected.

High-speed printer

BAC and ADC curves can be printed in addition to calculation results (including pass/fail results) and assessed profiles. The printer offers an easy-to-understand layout and can also print horizontally to match the content displayed on the LCD. Furthermore, printing speed is approximately 50% faster than conventional models.

Sheet buttons

Frequently used functions, such as the measurement start button, are provided as rugged sheet buttons with excellent durability.

**Built-in battery**

With drastically enhanced power compared to conventional models, the Surftest SJ-310 can make 1,500 continuous measurements on a full charge achieved in 4 hours.

**Highly functional detectors and drive units**

**Detector supplied as standard**

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

One of two types may be selected:

- Measuring force: 0.75 mN
  - Stylus tip: Tip radius 2 µm
  - Tip angle 60°

- Measuring force: 4 mN
  - Stylus tip: Tip radius 5 µm
  - Tip angle 90°

**Drive units**

- **Standard drive unit**
  - Popular standard drive unit

- **Transverse tracing drive unit**
  - Best suited for measurement of narrow, shrouded workpiece features such as crankshaft bearings, EDM parts, etc. (Patent Registered in Japan)

- **Retractable drive unit**
  - The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose shape cannot be easily seen, such as a blind hole, etc.

**Links to a wide variety of external instruments**

You can save parameter recalculations and measurement results in text format on a memory card and import into commercial spreadsheet software on a PC. You can also connect to a PC using the USB connector and use a dedicated software application to perform everything from measurement control and condition modification to issuing inspection result reports.
Switches between icon and text display

The display can be switched between icon and text, providing easy, user-friendly operation. Additionally, the guidance feature provides detailed explanations of touch-screen buttons.

Easy specification of assessment conditions from a list

Setting assessment conditions is simple because you can select the desired condition from a displayed list (e.g., standard, parameter).

Zooming waveforms and analyzing coordinate differences

You can not only magnify or shrink waveforms, but also calculate the coordinate difference between two points using a ruler operation. You can quickly check the irregularity status without waiting for a printout.

Deleting unnecessary data

With the Surftest SJ-310, you can delete portions of measurement data. This feature allows you to make new calculations by deleting data that should not be included in parameter calculation, such as data on a scratch.

Displaying GO/NG judgment results

By specifying a tolerance in advance, you can display pass/fail results in color.

Surface texture symbol entry

You can enter assessment conditions using ISO/JIS surface texture symbols.
(Patent registered in Japan, U.S.A., Germany, UK, France)
(Patent pending in China)
Using the result of a single measurement, you can make calculations or analyze assessment profiles under two different assessment conditions (standard, profile, filter, etc.) without using the recalculation feature.

An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit.

You can make a maximum of 300 statistical measurements using up to three parameters to obtain averages, standard deviations, maximums, minimums, passing rates, and histograms (upper and lower limits can be displayed). This feature is ideal for day-to-day data management.

Measurement results can be presented in the form of a 1-parameter, profile, 4-parameter or trace display.

After completing measurement, you can modify the assessment conditions (standard, profile, and parameter) and easily recalculate the results using the new condition.*  

* Not possible with all measurement conditions.

Measurement results can be displayed in several ways:

- 1-parameter display: one parameter measurement result
- Profile display: one parameter measurement result and the measured profile
- 4-parameter display: multiple parameter measurement results
- Trace display: the ten latest measurement results using the same parameter

Recalculation function

Dual assessment of a single measurement

Using the result of a single measurement, you can make calculations or analyze assessment profiles under two different assessment conditions (standard, profile, filter, etc.) without using the recalculation feature.

Stylus alarm function

An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit.

Positive stylus contact indication

Stylus contact with the workpiece is indicated by color coding in the display. This is helpful when visibility of the surface to be measured is restricted (e.g. when measuring within a shrouded feature or groove).

Extensive statistical processing features

You can make a maximum of 300 statistical measurements using up to three parameters to obtain averages, standard deviations, maximums, minimums, passing rates, and histograms (upper and lower limits can be displayed). This feature is ideal for day-to-day data management.

### Measuring range
- **Detector**
  - **Range**: 14400 µin (-7900 µin to +6300 µin)
  - **[360 µin (0.20 µin to +160 µin)]**
  - **[240 µin (0.05 µin to +120 µin)]**

### Measuring speed
- When measuring: 0.01, 0.02, 0.03 in/s (0.25mm/s, 0.5mm/s, 2.5mm/s), When returning: 0.04 in/s (1mm/s)

### Applicable standards
- JIS '82/JIS '94/JIS '01/ISO '97/ANSI/VDA

### Cut-off length
- **z**: (0.08, 0.25, 0.8, 2.5, 8 mm)
- **c**: 100, 200, 300 µin (2.5, 8 µm)

### Number of sampling lengths
- **1**: 1 sample length
- **2**: 2 sample lengths
- **3**: 3 sample lengths
- **4**: 4 sample lengths
- **5**: 5 sample lengths
- **6**: 6 sample lengths
- **7**: 7 sample lengths
- **8**: 8 sample lengths
- **9**: 9 sample lengths
- **10**: 10 sample lengths

### Sampling length
- **0.003**: 0.003 in (0.08 mm)
- **0.01**: 0.01 in (0.25 mm)
- **0.03**: 0.03 in (0.8 mm)
- **0.1**: 0.1 in (2.5 mm)
- **0.3**: 0.3 in (8 mm)

### Measuring range/resolution
- **1**: 14400 µin (-7900 µin to +6300 µin)
- **2**: 4000 µin (2.5µm)
- **3**: 1000 µin (2.5µm)

### Memory card (option)
- 500 measurement conditions, 10000 measuring data, 10000 text data, 500 statistic data,
- Internal memory: Measurement condition (10 sets)

### Mass
- About 3.9 lbs. (1.8 kg) (Display unit + Drive unit + Standard detector)

### Standard accessories
- 12AAW066 Connecting cable (8)
- 178-601 Roughness reference specimen (Ra3 µm)
- 357651 AC adapter
- 12AA217 Nosepiece for plane surface
- 12AA218 Nosepiece for cylinder
- 12AA216 Supporting leg
- 12BAP600 Carrying case
- 12BAG834 Stylus pen
- 12BAP620 Protection sheet
- 12BAG832 Printer paper (5 pieces)
- 12BAL400 Carrying case
- Philips screwdriver, Strap for stylus pen, Operation manual, Quick reference manual, Warranty

- Nose mounting screw (2 pcs.)
  - Black : 2 µm
  - White : 5 µm
  - Yellow: 10 µm

**Custom-made for special order**

Any specified detector other than above listed can be custom-made for special order. Please consult your local Mitutoyo sales office.
Optional accessories for SJ-210/310 Series

### Drive unit accessories

**Nosepiece for flat surfaces**

- **12AAA217**

**Nosepiece for cylindrical surfaces**

- **12AAA218**

**Note 1:** Standard accessory for the standard/retractable drive unit of the SJ-310 Series  
**Note 2:** Not available for the transverse tracing drive unit.

**V-type adapter**

- **12AAE644**

**Note 1:** Transverse tracing type standard accessory  
**Note 2:** Dedicated to the transverse tracing drive unit.

**Extension rod (50 mm)**

- **12AAA210**

**Note 1:** Not available for the transverse tracing drive unit.

**Extension cable (1 m)**

- **12BAA303**

**Note 1:** Only one rod can be used.

**Support feet set**

- **12AAA216**

**Note 1:** Standard accessory for the standard/retractable drive unit of the SJ-310 Series  
**Note 2:** Not attachable to the detector side of the transverse tracing drive unit.

**Magnetic stand adapter**

- **12AAA221**  
  (Mounting spigot diameter is 8 mm)  
- **12AAA220**  
  (Mounting spigot diameter is 9.5 mm)

**Point-contact adapter**

- **12AAE643**

**Note 1:** Transverse tracing type standard accessory  
**Note 2:** Dedicated to the transverse tracing drive unit.

**Vertical positioning adapter**

- **12AAA219**

**Note:** Suitable for a height gage holder designed for 9 × 9 mm section scribers.

**Height gage adapter**

- **12AAA222**

**Note:** Suitable for the transverse tracing drive unit.
Optional accessories for SJ-210/310 Series

Setting attachments

Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.

**Setting attachment: V type for measuring in the cylinder axis direction**

The V-width is adjustable to the cylinder diameter facilitating axial measurement of a wide range of cylinder diameters.

- Adjustable range: ø5 - ø150 mm

![V type attachment]

178-033

**Setting attachment: Slider type**

This attachment is ideal for measuring a flat area of a workpiece that has an indentation or step that makes it difficult to attach the drive unit.

![Slider type attachment]

178-034

**Setting attachment: Inside diameter type**

Greatly facilitates measurement of internal wall surfaces of, for example, a cylinder block.

- Applicable diameter: ø75 - ø95 mm
- Accessible depth: 30 - 135 mm

![Inside diameter type attachment]

178-035

- Custom-made for special order

Any specified attachment other than above listed can be custom-made for special order. Please consult your local Mitutoyo sales office. Example: measurements for crankshaft, cylinder-block bores

This unit allows you to remotely load Surftest SJ-210/310 Series calculation results (SPC output) into commercial spreadsheet software on a PC.

You can essentially use a one-touch operation to enter the calculation results (values) into the cells in the spreadsheet software.

Calculation results input unit  INPUT TOOL

This unit allows you to load Surftest SJ-210/310 Series calculation results (SPC output) into commercial spreadsheet software on a PC via a USB connector. You can essentially use a one-touch operation to enter the calculation results (values) into the cells in the spreadsheet software.

**U-WAVE-T**
(Connects to the SJ-210/310 Series)
02AZD880G
* Requires the optional connection cable. 02AZD790D

**U-WAVE-R**
(Connects to the PC)
02AZD810D

---

**Digimatic mini processor  DP-1VA LOGGER**

By connecting this printer to the Surftest SJ-210/310 Series’ digimatic output, you can print* calculation results, perform a variety of statistical analysis, draw a histogram or D chart, and also perform complicated operations for X-R control charts.

* The symbol ‘µm’ is not printable, but measurement results can still be printed out without setting the measurement unit.

**Foot switch**

A foot switch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

**Memory card (2GB / 8GB)**

12AAW452 / 64PMI244
Note 1: micro SD card (with a conversion adapter to SD card)
Note 2: Not all memory cards can be recognized. Please use the optional SD memory card.

---

**Roughness specimen W**

Display: Ra = Approx. 3 µm,
Approx. 0.4 µm

178-604
Note: Ra = Approx. 0.4 µm can only be used for stylus tip checking.

Optional accessories for SJ-210/310 Series

Simplified communication program for SURFTEST SJ-210/310 Series

The Surftest SJ-210/310 Series has a USB interface, enabling setting up measurement conditions and starting the measurement via PC. We also provide a program that allows you to create inspection record tables using a Microsoft Excel* macro.

Required environment*:
- OS: Windows 7
  - Windows 8
  - Windows 10
- Spreadsheet software:
  - Microsoft Excel 2010
  - Microsoft Excel 2013
  - Microsoft Excel 2016

* Windows OS and Microsoft Excel are products of Microsoft Corporation.

The optional USB cable is also required.
- USB cable for SJ-210 Series (2 m) 12AAAL068
- USB cable for SJ-310 Series 12AAD510

Note: USB Communication cable (commercial item: Equivalent to A and mini-B type for device-host A)

This program can be downloaded free of charge from the Mitutoyo website. 
http://www.mitutoyo.com/about/contactingmac/surftestsimplecommunicationprogram/

Contour/Roughness analysis software FORMTRACEPAK-AP

More advanced analysis can be performed by loading SJ-210/310 Series measurement data to software program FORMTRACEPAK-AP via a memory card (option) for processing back at base.

Refer to the FORMTRACEPAK Bulletin No. 2010(2) for more details.
Optional Accessories

For SJ-210 Series

• Printer for SJ-210

Assessed profiles, calculation results and curves can be printed out by connecting the SJ-210-dedicated printer, which is palm sized (W×D×H: 93×125×70 mm) and can run on an internal battery.

- Power supply can be selected. (AC adapter or battery pack)
- Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

Unit configuration:
1) Printer main unit 1 unit
2) Printer connecting cable (For the connection to the SJ-210)
3) Printing paper 6 rolls
4) Battery pack 1 piece
5) Exclusive use AC adaptor (with AC power cord) 1 piece

Example of the output by the printer

Optional accessories and consumables for SJ-210
- Protective sheet for the color LCD (5-sheet set) 12AAL066
- Connecting cable (for SJ-210 Series) 12AAL067

For SJ-310 Series

• Optional accessories and consumables for SJ-310

Printer paper standard type (5 rolls) 270732
Durable printer paper (5 rolls) 12AAA876
Touch-screen protector sheet (10 sheets) 12AAN040
Connecting cable (for SJ-310 Series) 12AAA882
Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
