Collection Scheduler

Keep critical measurements on track with MeasurLink Collection Scheduler. Designed for customers that manufacture and measure on a timed measurement schedule, Collection Scheduler works in conjunction with any Real-Time edition to alert operators when the next measurement is due with a colorful Andon display and timer. The perfect tool to keep measurements on-time for operators running multiple machines or jobs, the Collection Scheduler timer will reset as soon as measurements have been taken in Real-Time.

Supervisors can receive email alerts when measurements miss their assigned schedule or simply keep an eye on the entire shop-floor schedule using Process Manager’s new Collection Scheduler view.

Features & Benefits

**Colorful Andon Display**
Run tiles turn red or yellow if schedules are due or about to be due to help operators easily recognize when measurements need to occur.

**Customized Schedules**
Set schedules for each day or shift to suit organizational needs.

**Auto-switch between modules**
Select the run due for measurement and automatically launch it in Real-Time. Suspend the run and automatically return to Collection Scheduler for easy operation.

**Customizable Layout**
Set the size and layout of the run tiles to make easy identification when managing multiple runs.
